Subject: Re:

Nick, I was with Vitek last night and we discussed this petition. As a strategy, I think 1 year makes more sense than 6 months right now and Vitek agrees. One wants there to be an obvious no loss of library subscriptions or suscriptions from rich world scientists to make the point. The copyright thing needs to be specified -- reuse commercially without permission would also be likely to prevent the main thing we want to happen without any obvious gain.

I am copying Harold, who also asked for my views.

Best from London, Bruce
